

School Improvement Program

The goal of school improvement programs at participating schools shall be to improve instruction, auxiliary services, school environment and school organization so as to meet the needs of all the school's students.

The Governing Board will foster school improvement by providing opportunities for shared decision-making at school sites; especially by school site councils.

The school site council shall develop a school improvement plan to guide the improvement activities. Upon Board approval of the plan, the site council shall assume responsibility for the ongoing review of its implementation and a periodic evaluation of the program's effectiveness. The council shall annually review the plan, establish the plan budget and update the plan to reflect changing improvement needs and priorities.

(cf. 0420 - Site-Based Management/Site Councils)
