

Integrated Pest Management Policy Statement

Structural and landscape pests can pose a significant problem to people and the environment. Toxic pest control chemicals can also pose a significant problem to people and environment. It is therefore the policy of the Fresno Unified School District to use Integrated Pest Management (IPM) procedures for the control of structural and landscape pests. IPM means that pest problems will be alleviated with the least possible hazard to people, property, and the environment by using IPM methods that are safe, effective, and economically feasible. Pesticides will be carefully evaluated before use and will only be used after non-toxic and other alternative methods have been considered.
