

Transportation

The Governing Board provides transportation for eligible students in accordance with Board policy, administrative regulations, and state and federal law. Transportation services shall depend upon student needs and a continuing assessment of financial resources, including district funds and state reimbursements.

The goals of district transportation services are:

1. To provide maximum safety for students between home and school and on school-sponsored trips.
2. To promote desirable student behavior and respect for traffic safety.
3. To provide assistance and transportation for handicapped students.
4. To provide transportation for field trips.

All school buses shall comply with inspection requirements specified in the Vehicle Code and administered by the California Highway Patrol.

The district may contract with a private carrier for transportation services whenever such an arrangement may be more economical than using district-owned or leased vehicles.
