

Student Teachers/University Interns

Student Teachers

Student teachers assigned to the district by teacher training institutions are assigned in a given school through the principal's office only and not by direct arrangements between the college supervisor and the master teacher.

Assignments of secondary student teachers (7-12) by the college supervisors shall be in accordance with an approved list of master teachers provided by the Assistant Superintendent for Instructional Support Services.

Assignments of elementary student teachers (K-6) shall be through direct arrangement between the college supervisor and the elementary principal with the approval of the Assistant Superintendent for Instructional Support Services.

Student teachers are to be evaluated by the master teacher as soon as the practice teaching assignment is completed. The principal shall maintain an awareness of student teacher performance through conferences with the master teacher.

Student teachers are not to serve as substitute teachers for the same period of time that they are receiving college credit for student teaching.
