Drivers shall inform their supervisors if at any time they are using a controlled substance which their physician has prescribed for therapeutic purposes. Drivers using such a substance may continue to perform safety-sensitive functions only if the physician has advised the driver that the substance will not adversely affect his/her ability to safely operate a commercial motor vehicle. (49 CFR 382.213)

Testing procedures and facilities used for the tests shall conform with the requirements of the Code of Federal Regulations, Title 49, Part 40 et seq.

Pre-Employment Tests

A pre-employment drug test shall be required of an applicant only after he/she has been offered the position. Drug tests shall be conducted before the first time a driver performs any safety-sensitive function for the district. (49 CFR 382.301)

Safety-sensitive functions include all on-duty functions performed from the time a driver begins work or is required to be ready to work until he/she is relieved from work and all responsibility for performing work. It includes driving; waiting to be dispatched; inspecting and servicing equipment; supervising, performing or assisting in loading and unloading; repairing or obtaining and waiting for help with a disabled vehicle; performing driver requirements related to accidents; and performing any other work for the district or paid work for any other entity. (49 CFR 382.107, 395.2)

Exceptions may be made for drivers who have participated in the drug testing program required by law within the previous 30 days, provided that the district has been able to make all verifications required by law. (49 CFR 382.301)

Pre-employment testing shall also be required of employees returning to work after a layoff period if the employee was removed from the random testing pool. If the employee remains in the random testing pool, additional testing shall not be necessary. (49 CFR 382.301)

Post-Accident Tests

As soon as practicable following an accident involving a district vehicle, the district shall test each driver for drugs and alcohol when:

the accident involves a fatality;

the accident involves a serious injury in which immediate medical treatment is required away from the scene of the accident;

the driver receives a citation under state or local law arising from the accident; or

the information available at the time of the accident indicates the driver's performance may have contributed to the accident.

Alcohol and controlled substance tests shall be conducted as soon after a documentable accident as practicable on any driver who was involved in an accident while operating a district vehicle.

Drivers shall make themselves readily available for testing, absent the need for immediate medical attention. (49 CFR 382.303)

No such driver shall use alcohol for eight hours after the accident, or until after he/she undergoes a post-accident alcohol test, whichever occurs first. (49 CFR 382.209)

If an alcohol test is not administered within two hours or if a drug test is not administered within 32 hours, the district shall prepare and maintain records explaining why the test was not conducted. Tests will not be given if not administered within eight hours after the accident for alcohol or within 32 hours for drugs.

Tests conducted by authorized federal, state or local officials will fulfill post-accident testing requirements provided they conform to applicable legal requirements and are obtained by the district. Breath tests will validate only the alcohol test and cannot be used to fulfill controlled substance testing obligations. (49 CFR 382.303)

Random Tests

Alcohol and drug tests shall be conducted on a random basis at unannounced times throughout the year. The number of random alcohol and drug tests shall be at least equal to those required by federal regulations. Tests for alcohol shall be conducted just before, during or just after the performance of safety-sensitive functions. Drivers shall be selected by a scientifically valid random process, and each driver shall have an equal chance of being tested each time selections are made. (49 CFR 382.305)

Reasonable Suspicion Tests

An alcohol or drug test shall be conducted if a supervisor or district official trained in accordance with law has reasonable suspicion that the driver has violated the district's alcohol or drug prohibitions. This reasonable suspicion must be based on specific, contemporaneous, articulable observations concerning the driver's appearance, behavior, speech or body odors. The observations may include indications of the chronic and withdrawal effects of controlled substances. (49 CFR 382.307)

Alcohol tests are authorized for reasonable suspicion only if the required observations are made during, just before or just after the period of the work day when the driver must comply with alcohol prohibitions. An alcohol test may not be conducted by the person who determines that reasonable suspicion exists to conduct such a test. If an alcohol test is not administered within two hours of a determination of reasonable suspicion, the district shall prepare and maintain a record explaining why this was not done. Attempts to conduct alcohol tests shall terminate after eight hours. (49 CFR 382.307)

A supervisor or district official who makes observations leading to a controlled substance reasonable suspicion test shall make a written record of his/her observations within 24 hours of the observed behavior or before the results of the drug test are released, whichever is earlier.
